Electronic Budget Transfer Information

The Vice Presidents and Deans will have the capability to transfer funds between areas for which they are responsible. The Department Chairs and Directors can only process transfers within their department.

The electronic budget transfer will:

- Only allow temporary transfers (BD04)
- Only process whole dollars (do not use cents)
- Only allow transfers between Maintenance and Operation (M&O) lines
- Will not process budget transfers for any salary lines, expense transfers, research or matching indexes ("R" or "M" as part of the index number), grants/restricted funds (different fund types), or between account codes that begin with the number "5" for revenue or "8" for transfer.

If the transfer involves these lines, a paper budget transfer will need to be completed and forwarded for signatures. The transfer will be entered once the budget office receives this information.

There are two types of electronic budget transfers that can be performed in self service: budget transfer (max of two lines) or multiple line budget transfer (max of five lines).

Instructions for Multiple Line Budget Transfer (Max of 5 lines)

- Log into My UCA, Self Service, Finance, choose Multiple Line Budget Transfer (max of 5 lines).

- The transaction date will default in as today’s date.

- The journal type has two choices: 1) BDDP-Departmental Budget Entry. The BDDP is for all Educational & General (E&G) index. 2) BDAX-Budget Entry Dept Auxiliary. The Budget Entry Dept Auxiliary is for all Auxiliary areas which include: Athletics, Housing, Food Service, Student Center, Radio Station, Farris Fields, HPER Recreation, Bookstore, Student Health Services, Post Office, and Parking Facilities.

- The document amount for the multiple line budget transfer is the total of all lines in the entry. For example, if you transfer $1,000(-) from M&O into travel $250(+), and into capital equipment $750(+), the total document amount is $2,000.

- The transfer section consists of five lines. The system will only allow you to process five lines per transaction.

- The Chart is “U”, enter the index number, the amount, and in the D/C section stipulate if funds are being moved into a line with a (+) or out of a line with a (-). The system will not fill in the fund, organization, or program at this point.

- Click Complete once, the system will now fill in the fund, organization, and program.
➢ Enter the **Account Code** to the corresponding (+) or (-).

➢ Enter the **Description**, example such as transfer funds to travel and capital lines. The budget period is **always “01”**.

➢ If a specific budget transfer is used frequently, the **Save as Template** title option must be entered before you click, complete, the second time. The template name cannot contain special characters such as: ; & / @ ? ) (.

➢ Click **Complete** again.

➢ When the document is processed, a message, such as **“Document J0018283 Completed and Forwarded to the Posting Process”** will display. If there is an error, a message will be displayed as to why this transaction is not completed. After the error(s) is/are corrected, click complete again. It is possible the electronic transfer may not be allowed if it involves lines mentioned in the information section of this document. If the transfer involves these lines, a paper budget transfer will need to be completed and forwarded for signatures. The transfer will be entered once the budget office receives this information.

**At the bottom of this form, it allows a code lookup with numerous types of selection criteria, such as account, index, organization, etc. After the criteria is chosen, execute query, the query results will display at the top of the page.**

**PLEASE SEE SELF SERVICE SCREEN SHOT BELOW**
Multiple Line Budget Transfer Form

Begin by creating a multiple line budget transfer or retrieving an existing template. If available budget exists, budget can be transferred among a maximum of five sets of accounting elements for different charts.

Choose Complete to perform a validation and forward the document for processing.

Use Code Lookup to query a list of available values.

Use template None
