Course Description Objectives

This is a continuation of Chemistry 2401. You must have a grade of C or better in Chem 2401 to be enrolled in this class. Furthermore, you *must* have a good understanding of the material taught in that class to be successful. This class is intended for students majoring in science and/or obtaining courses required for pre-medicine, pre-dentistry, pre-pharmacy, and other related health fields.

Topics we will explore include, but are not limited to: NMR spectroscopy; conjugated and aromatic molecules; alcohols, phenols and epoxides; carbonyl compounds; amines; carbohydrates, nucleic acids, lipids, proteins and amino acids.

Objectives

At the end of this semester, you should have a good working knowledge of the material covered in the Smith textbook as it pertains to the general field of organic chemistry. Students will a passing grade in this course should be able to do well on graduate school entrance exams for organic chemistry, etc. the organic chemistry portions of MCAT, DAT, PCAT, I also want my students prepared to take senior level biochemistry.

Attendance and Make-Up Work: Students are expected to attend all lectures and labs. A student missing multiple classes without contacting me to give me a valid reason may be dropped with a "WF" grade. Makeup exams are not given unless you are participating in a conflicting UCA-sanctioned event. If you miss an exam, and contact me promptly with a valid explanation, your other exams will be count more to make up for the loss of points. If you do not contact me promptly or lack a valid reason for missing an exam, a grade of 0 will be assigned. There is a detailed explanation of this protocol posted on blackboard; please read it thoroughly before asking for an explanation.

Writing an Exam Early, Including the Final Exam: Not allowed.

Electronic Devices: Students may not use any electronic devices during tests or quizzes for any reason. Doing so will be considered to be cheating.

Cell Phone Policy: Students should turn their cell phones to silent (turn off the vibrate mode) at the start of class and leave them off throughout the entire class. You may access your messages at the break time if there is one.

Schedule: Although we will work through the material at our own pace, past experience shows that we will be pretty close to the schedule set out in this syllabus. You are responsible to keep up with the material. It is strongly recommended that you read approximately the next day's material before each lecture. We will go through chapters 12-25, and 31, of the text book.

Homework: Homework will be assigned, but it will not be collected or graded. It is very strongly recommended that you do, at a minimum, all of the assigned homework in a timely manner (don't cram! It has to worked on regularly). It is the only way you can check your understanding of the material. Many of the exam and quiz questions come from the homework.

<u>4 tests</u>	100 points each
<u>1 final exam</u>	200 points
