Professionalism Collection

Each candidate will collect evidence for a Professionalism Collection. Throughout the semester, candidates will share their progress toward the artifact collection with their supervisors at the conclusion of each on-site lesson observation. At least one artifact should be included in the collection for each of the following elements of the TESS Summative Evaluation:

4b – Maintaining Accurate Records
4c – Communicating with Families
4d – Participating in a Professional Community
4e – Growing and Developing Professionally

The TESS Summative Evaluation can be used as a resource for appropriate documentation. Additionally, each lesson reflection will prompt candidates to add to individual logs to document evidence gathering opportunities.

Near the end of the semester, the Professionalism Collection should be uploaded as an attachment to the Domain 4 Reflective Essay. It will contain at least one artifact for each of the elements (4b-4e), as well as dated logs accumulated throughout the semester.

For specific evaluation criteria, see the Domains 3 and 4 Reflective Essay rubric.
