FAQ’S

• What are the strengths of this residency program?
The UCA Pediatric Physical Therapy Residency Program provides outstanding opportunities for residents to experience pediatric clinical practice across the spectrum of pediatric PT. From the NICU to School age and beyond, residents are able to participate in clinical applications, research and teaching to advance their knowledge and enhance their abilities to positively impact the lives of future pediatric patients.

• How long is the residency?
12 months

• Does the residency include employment?
Yes. Residents are employed at Allied Therapy and Consulting Services or at Arkansas Children’s Hospital

• How is the employment facility determined?
The Residency Advisory Committee determines resident placement based on previous experiences and resident strengths with resident preference considered in placement decisions.

• Do Residents earn a salary and benefits?
Yes. Residents earn a salary (approximately 70%) and are eligible for full time benefits during the residency.

• Do you accept new graduates?
Yes. Applicants may be new graduates or may be experienced clinicians wishing to advance expertise in pediatric physical therapy.

• What costs are associated with the program?
Residents are responsible for tuition and fees for graduate courses (9 graduate credit hours) during the residency. Residents are eligible for tuition reimbursement through the primary employer to offset costs of tuition.
