

Record, Edit, & Share Video from an iPhone/iPad

Camera

Recording video. Rotate your device into landscape with the Home button on the right side.

Photos

Trim video. With your video open, tap Edit to display the controls, drag either end of the frame viewer, then tap Done. Tap Save as New Clip to save a new trimmed video clip in your Videos album. Note: Be sure to return to the original video clip to make new video segments.

iMovie

Combine clips. If necessary, combine multiple video clips into one clip using iMovie. iMovie is free with an iOS device purchased after Sept. 1, 2013. It is \$4.99 for older devices. For help, visit: help.apple.com/imovie/ipad/2.2

YouTube

Share to YouTube. Using the Share button (seen here), share your video to YouTube and mark it as either Unlisted or Private.
