READER BEARS is a reading clinic designed for children, kindergarten through second grade, who are at risk for or are experiencing difficulties with reading. Multisensory methods are used to help children develop skills according to their ability level. These skills include phonological awareness, letter-sound association, sound blending, reading fluency, and reading comprehension.

THE READER BEARS program includes:
* Phonological awareness (listening, rhyming and segmentation)
* Sound-symbol association (letter sounds)
* Decoding (sounding out words)
* Encoding (building words with sounds)
* Sight word recognition
* Reading fluency

Register now, space is limited!
