Math Core Team (MCT)
Math and Science Partnership grant

A Special Professional Development for 3-5 grade Teachers

The main goal of the project is to enhance teacher content knowledge and teaching skills that prepare students for success in the CCSS mathematics. The program proposes to offer teacher professional development mathematics initiatives that will enhance learning progressions and support the coordination of the CCSS, curriculum, instructional practices and multiple forms of assessment. The mathematics initiatives will align with the comprehensive implementation plan developed by the state implementation team.
