**Notes**

<sup>1</sup> This course is required for students seeking admission to the Master of Science in Occupational Therapy program at UCA.

<sup>2</sup> MATH 1390 College Algebra is a prerequisite for CHEM 1402 and CHEM 1450.

<sup>3</sup> See appropriate choices, alternatives, or substitutions under "UCA Core" in the Undergraduate Bulletin. During the first year, a student must complete a UCA Core course designated as a First-Year Seminar (FYS) in Critical Inquiry, Diversity, or Responsible Living. An approved UCA Core lab science and an approved UCA Core math course should be taken in the first two years if possible.

<sup>4</sup> PSYC 1300 and CHEM 1402 or 1450 are prerequisites to courses (PSYC 4320 and BIOL 2406) required for admission to the Master of Science in Occupational Therapy program.

<sup>5</sup> The student must complete 43 credit hours of FACS, IDSN, or NUTR courses selected in consultation with a major advisor.

<sup>6</sup> Depending on the math or science courses selected to satisfy the special degree requirements for a Bachelor of Science, the student will need to adjust the number of general elective hours in this PCP. For further details about the BS Science/Math requirement, see the *Undergraduate Bulletin*, “Degree Requirements,” § 2.2.5, Bachelor of Science.

<sup>7</sup> The student will also need to complete major, minor, or general elective courses designated as fulfilling the upper-division and capstone requirements of the UCA Core. The student must complete upper-division UCA Core courses that address each of the four UCA Core areas: Diversity (D), Critical Inquiry (I), Communication (C), and Responsible Living (R). One course may address up to two areas. See the [Department of Family and Consumer Sciences page](#) in the *Undergraduate Bulletin* for courses within the major that fulfill the UD UCA Core requirements.
