
Where to Find Reports from the Student Course Experience Survey (“course evals”)

Fall 2017 and Later

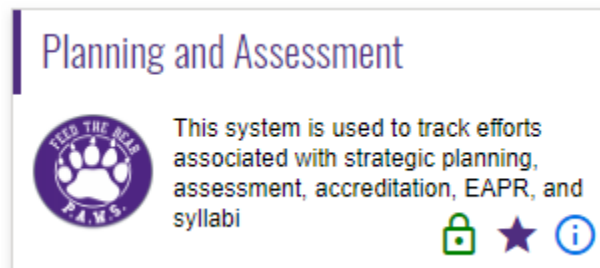

In Fall 2017, UCA for the first time used the eXplorance Blue system for its course evals (the “student course experience surveys”). Reports for individual faculty and for administrators who have report viewing access are available in the appropriate user’s Dashboard—the screen that first appears when entering the eXplorance Blue system. To do so, find and enter this “channel” in myUCA (this was, formerly, called the Course Evaluation channel):

Note that the Blue dashboard (“My Home”) has two tabs—Current and Archived. If you don’t see what you are looking for in the Current list, check in the Archived list.

AY 2011–2012 through AY 2016–2017

The PAWS system—the name of the channel/task in myUCA is Planning and Assessment—holds the archives for pre-eXplorance eval reports. To use the archives, find and enter this “task” in myUCA:

Individual faculty members will see and have access ONLY to their own materials; department chairs/school directors will have access to materials for each of their faculty members. Click on the enigmatic phrase File Distribution appearing just below your name or your faculty member’s name. On the left side of the window is a list of academic years. Click on a year or term, and links to all available reports for that year by term will appear in the main/middle part of the window.
