The UCA Student Health Clinic will now begin vaccinating immediate family members of UCA faculty and staff. This includes any family members age 16 years and older who live in the house. To make an appointment, call 501-450-3136 and schedule one today!

UCA is dedicated to the health and well-being of its students, faculty, and staff, and making the vaccine available to immediate family members is one way to continue to protect our campus community. Covid-19 vaccines will continue to be administered in the Student Health Clinic throughout the summer.
