# GET VACCINATED

## PROTECT YOURSELF AND OUR COMMUNITY

Vaccination is the pathway to a healthy campus community and a full and robust campus experience. Do your part to protect our students, faculty and staff.

### ARE COVID-19 VACCINES SAFE?

*Millions of people in the U.S. have received COVID-19 vaccines under the most intense safety monitoring in US history. These vaccines cannot give you COVID-19.* Some people have no side effects. Others have reported short-term side effects like pain or swelling at the injection site. You may also have tiredness, headache, chills, fever or nausea. These reactions are common and should go away in a couple of days. Serious safety problems are very rare.

### ARE COVID-19 VACCINES EFFECTIVE?

*Getting fully vaccinated against COVID-19 will help protect you from getting severely ill with COVID-19 and will make it less likely that you will spread the virus to those around you, including your friends, family, and coworkers.*

### HOW LONG DOES IT TAKE TO BE FULLY VACCINATED?

*It takes 2 weeks after vaccination for protection against COVID-19. You are not fully vaccinated until 2 weeks after the second dose of a 2-dose vaccine or 2 weeks after a single-dose vaccine. After you are fully vaccinated, you can resume activities that you did before the pandemic, in accordance with current public health guidance.*

### WHERE CAN I GET A COVID-19 VACCINE?

*COVID-19 vaccines are FREE for students and employees  
Call the UCA Student Health Clinic at (501) 450-3136 to schedule an appointment.*
