

College of Natural Science and Mathematics
Council of Chairs Meeting Minutes
April 17, 2023

Topics Discussed:

- Dr. Addison will meet with the Provost in May to give her an update on the Science Education and Mathematics Education programs.
- Todd Abel gave a presentation as to the model for Mathematics and provided examples for other departments to follow. He provided a list of courses that would be required for content by the Department of Education. Classes can be added or removed as long as it falls within the guidelines.
- There was a discussion of the internships and possible Intern Coordinator.
 - Internship 1 is a course the student takes a semester before student teaching in class, two days a week.
 - Internship 2 is all day, every day.
 - Proposal for a yearlong residency would be two complete semesters
- Chairs should have a plan as to what courses are in their degree plan, then plan to present them to the provost. Plans are to be presented in the fall.
