

UNIVERSITY OF CENTRAL ARKANSAS
DOCUMENTATION CRITERIA FOR STUDENTS WITH PHYSICAL,
SENSORY AND HEALTH-RELATED DISABILITIES

A student with a physical, sensory or health-related disability is to provide documentation verifying a disabling condition by a licensed health care professional who is qualified in the diagnosis of the disability and is currently or recently associated with the student. The diagnosis must reflect the student's present level of functioning as it relates to the major life activity affected by the disability. The documentation must also include recommendations regarding effective academic accommodations to equalize this student's educational opportunities at the post-secondary level (e.g. describe the services or accommodations needed for exam administration, classroom or study activities or fulfillment of course requirement). The student must present the verified documentation to the Disability Resource Center prior to receiving accommodations and/or services. The cost of obtaining the professional verification is the student's responsibility. Questions regarding documentation and assessment procedures can be addressed to:

Disability Resource Center
