OCCUPATIONAL THERAPY

Occupational Therapy evaluates for and addresses difficulties with fine motor, visual reception, grasping, visual motor integration, self-care, sensory processing, and primitive reflex integration to facilitate age appropriate play and learning.

SPEECH THERAPY

Speech Therapy evaluates and treats difficulties with expressive and receptive language, articulation, fluency, oral motor coordination, and voice production to facilitate age appropriate play and learning.

PHYSICAL THERAPY

Physical therapy evaluates and treats difficulties with balance, agility, strength, and quality of gross motor movement to facilitate age appropriate play and learning.
