Our Mission

At TheraPEDS, our mission is to provide **mobile** comprehensive therapy services to children in central Arkansas with all disabilities and needs using the most updated therapeutic intervention approaches in order to promote functional outcomes and age-appropriate developmental milestones in their most natural environment.

Common Pediatric Diagnosis'

Developmental/Gross Motor Delay
 Sensory Processing Disorder
 Genetic Syndrome
 Down Syndrome
 Autism
 Hypo/Hypertonia
 ADHD/ADD
 Cerebral Palsy
 Failure to Thrive
 Torticollis
 Traumatic Brain Injuries

Facilitates Success in School

Customizes strategies that address the full breadth of school activities, including:

- Completing schoolwork
- Riding the bus
- Eating with friends in the cafeteria
- Behaving appropriately
- Paying attention in class

Provides Early Intervention Services

- Develops physical abilities such as sitting independently, crawling, and self-help skills
- Builds social skills like sharing, taking turns, and coping with disappointment
- Helps develop creativity and imagination through toys and functional play

“Play illuminates a child’s heart and soul, unleashing their ability to shine.”

- Madeline Dunlap

Promotes Healthy Lifestyles

Works with schools, daycares, and individual families by:

- Developing summer/after-school programs focused on healthy lifestyles
- Organizing fun physical activities for children of all abilities
- Strengthening social skills for participants

Helps Integrate Primitive Reflexes

As children develop and gain volitional movement, the primitive reflexes become integrated and are overridden by conscious thought of movement. Often times when these reflexes do not integrate, it can affect fluidity of movement, strength, flexibility, hand-eye coordination, attention, and other developmental skills.
