WE ARE HIRING

Registered Occupational Therapists – Full & Part-time

Licensed Speech-Language Pathologists – Full & Part-time

WHO WE SERVE

CHILDREN BIRTH TO ADOLESCENTS

Occupational Therapist complete screenings, standardized testing, and non-standardized methods to evaluate fine motor skills, gross motor skills, strength, balance & coordination, visual motor/perceptual skills, feeding/self-care skills, and sensory processing skills. Speech-Language Pathologists complete screenings and standardized testing to evaluate a child's feeding/swallowing skills, articulation, fluency, language development, and language-based learning skills such as problem solving, memory, phonological awareness, and reading comprehension.

We offer individual treatment sessions based on the interpretation of the evaluation to meet the individual needs of the child.

ADULTS

Speech-Language Pathologist complete voice, cognition/memory, expressive/receptive language, executive function, word finding, fluency, articulation, written language, visuospatial skills, oral motor planning, and feeding/swallowing evaluations. Treatment is developed in collaboration with the goals of the client and results of the assessments.
