*The University of Central  
Arkansas*

**Summer 2023**

## Does your child have difficulty with reading?

### Read to Succeed+

### Growth Mindset training!!

is designed to help students feel successful and proud of his or her accomplishments.

*"Don't miss it! We teach reading using a multisensory approach, so students can feel, taste, and smell reinforcing optimal learning"*

### WHAT 1:

### **Growth mindset training** (2:00-2:30)

(no extra fee charged)

When students believe they can improve and even get smarter, they are more likely to put in extra time and effort in their school work.

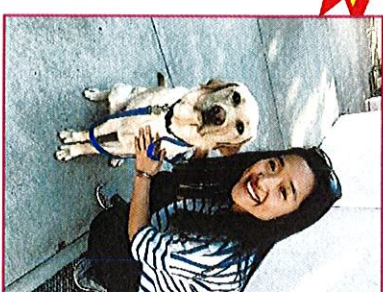

Growth Mindset lesson units will teach basics about the brain, brain plasticity, behavior, and how we can change our brains by what we do. This will include attention and regulation, executive function skills (plan, organize, and sequence kids' thoughts), and hand-writing skills.

### WHAT 2:

### **Literacy Intervention** (2:30-4:00)

Using evidence-based intervention founded upon the principles of Orton-Gillingham, Read to Succeed! will provide training in:

- Sound symbol association
- Phonological awareness
- Syllable Instruction
- Oral Reading fluency
- Written text comprehension

**Camo, Canine Companions for Independence certified facility dog, will assist with our activities.**

### WHO

Children, entering third through sixth grade, who are experiencing difficulties with reading and/or spelling or diagnosed with dyslexia
