**Senators Absent:** Hunter Roberts, Julia Robison, Shad Foley

### **I. Call to Order**

- A. President Shook called the Staff Senate to order at 10:00 a.m. on Zoom.

### **II. Approval of October 14, 2020 Meeting Minutes**

- A. The minutes from the October 14, 2020 meeting were reviewed via email and approved electronically.

### **III. Guest Speaker - Larry Lawrence**

- A. Larry Lawrence answered questions presented by Staff Senate.

- 1. **Why does it sometimes take so long for retired items to be picked up? Should we be placing these items in the hallways?**

In normal, pre-COVID times we had five people moving retired and transferred items, not including moving items for events. Now they have a reduced staff and there are only two people working in that department. They do work on Saturday's and sometimes can pull people from other departments. They are getting to stuff as quickly as they can, but never put things in the hallways because they could be in violation of fire codes.

**2. Who is responsible for opening and closing the buildings? In particular non-teaching buildings. Can a request be made to lock non-teaching buildings earlier than the norm?**

Some buildings require a physical key and those buildings are generally opened and closed by the custodial staff. Other buildings require card access and the lock shop programs those buildings to lock and unlock at specific times. Some of the non-teaching buildings are opened and closed by the people who work in those buildings. Residence halls are always locked and only open with key card access.

**3. Are key requests going to be put online anytime soon?**

I won't say that they will never be online as there is a possibility that it could be a thing someday. Having the carbon copy has been very useful for the key process. Moving to an online system won't be soon, but we will look in it.

**4. Why isn't the Physical Plant website like all the other departments on campus, showing the people that work there and a phone number on how they can be reached? Can this be added?**

The managers have pictures with their phone numbers, but not everyone is included because of the amount of people who work in the department. Also, most of the people who are not pictured are constantly on the move and often share work phones.

**5. What updates do you have regarding the S.E.E.D. committee?**

The committee meets a few times a year. There is technically not a budget for this committee, but they receive funding for projects through the campus. They have added solar lighting along the Stone Dam Creek walking trail and have added solar heating to the cafeteria. Additionally, they research what chemicals are used on the lawns and work to ensure that our campus is as eco friendly as possible. [S.E.E.D. Committee Minutes](#)

**6. Who do we contact to request outside lighting where it is desperately needed as a safety issue?**

If you need anything, contact Larry via email. There is a night crew that comes out at night and looks to see if any lighting is out. We also are

wanting to get funding for LED lights as they have to replace them less frequently.

**7. Are we going to create a process that lets a person who has created a work request know when an order will be completed and once it has been completed?**

We currently use a system called Mainsaver as an online way to submit the requests. There is a way to look at the status of the job, but things are moving slower as we are down a lot of staff members. As always we will look at ways to improve the process.

**8. A senator had a coworker ask if they can take the carpet out of their office and put in vinyl? (They have very bad allergies.)**

Probably. If it's a small office we can look at it and see what we can do. Often we can take out carpet and paint the floor. If someone is requesting this, they will need the funds to do so.

**Note about parking:** The plan is to replace as many spaces as are being taken out. Once construction has been finished, we will have about 30-40 more parking spots than what we have originally. Some of the parking might be a bit further away, but there will be parking and more lots will be coming in the future. We want to be able to eventually pave all of the gravel lots for accessibility, but for right now we have all of the new ADA spots near Lewis Science. We want our ADA spots closer to the buildings.

## **VI. University Committee Reports**

- A. None.

## **VII. Campus Q&A**

- A. None.

## **VIII. Constituent Concerns**

- A. **Questions:** What is work overload, how does it work, and does it affect the bonuses that will be received next month?

Response:

Worker overload is something that is available to non-classified staff. It works differently than “other duties as assigned.” For example: Nadia does her job, but also teaches a class. This is a duty that is different from their normal job and counts as overload. The bonuses only have to do with the base pay, so work overload will not be factored in.

- B. The School of Communication has an event they need volunteers for. They will need to check with Human Resources to see if this event can be considered for holiday time.
  
- C. Holiday time is accrued hour by hour. Those hours are entered once a month. They will have a totally separate line under leave balances. The hours accrued with Staff Senate can only be used for the two days during the winter break.
