Rotate a Video 90 degrees with VLC Media Player (Version 2.0+)

Have you ever captured video with your cell phone or camcorder only to discover when you play it back on your computer that the video is rotated 90 degrees? Or maybe you shot it that way on purpose because you preferred portrait style to a landscape view? Before you go straining your neck or flipping your monitor on its side to watch your video, we'll show you an easier method.

Rotate and Watch a Video in VLC Media Player

Open VLC Media Player. (If you need to download VLC, you can find it for free at the following website: <u>http://www.videolan.org/vlc/</u>)
