Re: Additional sanitation efforts

The UCA Physical Plant is performing additional cleaning and sanitation for contact areas. Examples of these areas are handrails, doorknobs, table tops, desktops, etc. Hand sanitizers are currently in the following buildings, typically in the lobby areas.

Physical Plant

Physical Therapy

Doyme Health Science

Estes Stadium

Weight Training Facility

Torreyson Library

Brewer Hegeman (near restroom areas)

Student Health

Additional hand sanitizers are on order to add for other E and G buildings. Three foggers have been purchased to spray disinfectant in areas of need, and UCA has a contractor on standby to assist with sanitizing efforts should the need arise. If you would like additional disinfecting supplies in your areas or have areas of high need, please let me know.
